

Smart software solutions for all needs related to color management, proofing, prototyping, certification & quality control

(BRAND) COLOR COMMUNICATION & EXCHANGE

Organize and edit your color easily and communicate all their (spectral) properties with your project partners and suppliers - in a simple & secure manner.

PROOFING & PROTOTYPING

In addition to "classic proofing", we have been focusing on packaging proofing and prototype production for many years.

COLOR MANAGEMENT & OPTIMIZATION

Get the most out of your printing presses! Achieve perfect colors and repeat printing results easily. Reach any industry standard and optimize your processes at the same time.

PROFILING

Compact solution - huge benefits: Create profiles for each of your devices and paper types - fast and easy. Without the need for expensive additional equipment with the highest quality reports.

QUALITY CONTROL & CERTIFICATION

Process control, quality assurance and certification are essential elements of professional color management. Monitor your workflow automatically.

PROOFING PAPER & PACKAGING SUBSTRATE

Innovative and exclusive proofing paper and packaging substrates with uniquely developed properties complete our proofing applications.

CXF TOOLS

Easy-to-use and efficient tools for organization & communication of (spectral) color. This is vitally important for brand owners and all of their suppliers worldwide.

CGS ORIS

We are working in the graphics industry for more than 35 years and provide simple to use software solutions for all your needs related to color management, proofing, prototyping, certification as well as proofing and packaging media.

COLOR TUNER

Classic proofing software for accurate and reliable simulation of printing results - a smart solution for agencies and designers as well as pre-press and printing companies.

FLEX PACK

Innovative system to produce color accurate packaging proofs and packaging samples. For stunning mockups, even with complex finishing effects - fast and cost-effective.

PRESS MATCHER

With this "allrounder" you get the most out of your printing presses. Match them reliably, reach any industry or house standard. As printing, packaging or industrial printing company you will optimize your daily business greatly.

X GAMUT

Are you printing with more than 4 colors? This software is specially tailored to streamline multicolor printing. The right choice for packaging and photographic printers.

LYNX

Very compact and cost-effective solution to generate optimal profiles for your devices and papers for immediate use. Simple to use, no extra equipment needed - just maximize your output.

CERTIFIED

Control and evaluate your proofs, processes and printing systems fast and easily - and certify your results. Very simple integration into any existing workflows. If quality is important for you - this is the suitable tool.

MEDIA

Large portfolio of exclusive proofing paper with unique properties - specially formulated for the stringent needs of digital proofing. Created and continuously developed based on detailed feedback from the printing industry.

MEDIA

Premium selection of various packaging substrates - specially developed for packaging proofs and mock-up production. Ideal material for mock-up agencies and packaging printers. Explore the stunning portfolio and start now!

Benefits at a glance

- ✓ Tailored solutions
